BASEDLondon, UK

PROFILE

I lead the technology at ImpactOS, an AI platform that turns messy ESG and social value data into audit-ready reports. I designed it and shipped the first version alone. Before that I co-founded a software company in Riyadh. I'm in my final year of AI and Computer Science at Birmingham, and I run a fleet of coding agents across three machines on an orchestrator I rebuilt from OpenAI's Symphony.

EXPERIENCE

ImpactOS Technical Co-Founder 2025 to now, London

An AI platform that turns messy ESG and social value data into audit-ready reports.

- Designed the system architecture and shipped the first version alone: frontend, backend and data.
- Runs a live CDP climate disclosure for a global investment manager. CDP has no API, so rebuilt its questionnaire from CDP's own data: answers are drafted with sources, approved by the client's reviewers and uploaded to its portal, with 96% of 3,345 cells matching.
- Built the ingestion and retrieval layer for spreadsheets and PDFs: fuzzy matching, embeddings, NL2SQL and knowledge graphs over DuckDB and Parquet.

IACT CTO 2026 to now, London

Smart boxing gloves that sense every punch, and the apps that coach and track a session.

- Built the native iOS app in SwiftUI, reading the gloves over Bluetooth, and shipped it to testers on TestFlight.
- Built the trainer and admin dashboard in Next.js on Convex, with live session data.
- Built the 3D investor demo in Three.js, and designed the investor and teaser decks.

Influencer.com, MVE and Creator Ventures Summer Intern 2026, London

Seven weeks with Caspar Lee, shipping internal software across his companies.

- Rebuilt Scout, MVE's creator-scouting tool, as a full-stack web app: AI search, a scoring engine that rates creators the way a quant rates assets, and agency and campaign views. Demoted it to the MVE team.
- Moved Influencer.com's internal operations app and its client pitch-deck app off Lovable onto Supabase and Clerk, and took the operations app live on an influencer.com subdomain.
- Migrated Proper Living's booking and resident platform to a new database with proper sign-in and access rules. It now runs properliving.co.za.

Access Technologies Co-Founder 2023 to 2024, Riyadh

Sports booking software for residential compounds in Saudi Arabia, built in a gap year.

- Set up a fully foreign-owned company in Saudi Arabia, endorsed by accelerators backed by PIF, the Saudi sovereign wealth fund.
- Designed and led the build of the admin portal and the iOS and Android app, with a small freelance team.
- Drafted the shareholder agreements, recruited engineers from UK universities and ran the sales team.

Earlier internships Summer 2022

Aston Martin F1, London. Web3 strategy with the Managing Director.

Fiera Real Estate, London. Internal tools with the fintech team.

Create Group, Dubai. Content and campaign strategy for regional clients.

EDUCATION

University of Birmingham

B.Sc. Artificial Intelligence and Computer Science
2024 to 2027
Final year

Semi-finalist, AI Innovator of the Year, Undergraduate of the Year Awards 2026

Team project: After Hours, an app for getting home safely at night. Set up the codebase and designed its safety-aware routing.

Cheltenham College

A Levels
2021 to 2023
Mathematics A, Computer Science A, Physics A

Jumeirah College, Dubai

GCSEs
2019 to 2021
A* in Mathematics, Computer Science, Physics, Chemistry and Biology

TOOLKIT

AI and retrieval
PyTorch, Transformers, Hugging Face, FAISS, Qdrant, LangChain

Data
Python, DuckDB, PostgreSQL, Pandas, Polars, PL/pgSQL

Product
TypeScript, React, Next.js, Tailwind, Node, Swift

Infrastructure
AWS, Docker, Kubernetes, FastAPI, Cloudflare, Vercel

Agents
Claude Code, Codex, MCP, Elixir, Electron, tmux

OUTSIDE WORK

Padel, rugby, golf, rowing, skiing, tennis and scuba diving.

PROJECTS

Symphony

Agent orchestration
A fork of OpenAI's Symphony, rebuilt beyond recognition. Runs coding agents across three machines.
Elixir · Electron · TypeScript

ImpactOS engine

Data ingestion
Maps whatever a client uploads to the right reporting framework, and answers questions on it.
Python · DuckDB · Parquet · Embeddings

Cortex

Personal AI assistant
Gmail, WhatsApp, Canvas, GitHub and Linear in one knowledge graph, with voice. Runs at home.
Electron · React · Node · Postgres

Scout

Creator intelligence
Rates creators the way a quant rates assets, for the talent agency MVE.
React · Supabase · Clerk · Postgres
