BASEDLondon, UK

PROFILE

I lead the technology at ImpactOS, an AI platform that turns messy ESG and social value data into audit-ready reports. I designed it and shipped the first version alone. Before that I co-founded a software company in Riyadh. I'm in my final year of AI and Computer Science at Birmingham, and I run a fleet of coding agents across three machines on tooling I wrote myself.

EXPERIENCE

ImpactOS Founding Technical Lead 2025 to now, London

An AI platform that turns messy ESG and social value data into audit-ready reports.

- Designed the system architecture and shipped the first version alone: frontend, backend and data.
- Built the ingestion and retrieval layer for spreadsheets and PDFs: fuzzy matching, embeddings, NL2SQL and knowledge graphs over DuckDB and Parquet.
- Designed a bronze, silver and gold ingestion pipeline with adaptive schema mapping, and prototyped synthetic data so analytics never touch personal data.
- Built the client portal in Next.js and Supabase, with documented APIs.
- Pitched the product to multinational companies, government bodies and universities, and rewrote the roadmap on what came back.

Access Technologies Co-Founder 2023 to 2024, Riyadh

Sports booking and management software for residential compounds in Saudi Arabia, built during a gap year.

- Set up a fully foreign-owned company in Saudi Arabia, endorsed by accelerators backed by PIF, the Saudi sovereign wealth fund.
- Built the admin portal and the consumer app for iOS and Android.
- Drafted the shareholder agreements, recruited engineers from UK universities and ran the sales team.
- Merged the product into a larger regional prop-tech platform.

Aston Martin F1 Summer Intern 2022, Silverstone

Worked with the Managing Director on the team's Web3 strategy.

- Researched digital trends across Formula 1 and wrote the presentations that went to senior executives.

Fiera Real Estate Summer Intern 2022, London

The UK real estate arm of Fiera Capital. Sat with the fintech team that builds the fund's internal tools.

- Supported internal tool development and shadowed both the technical and the financial side of fund management.
- Sat in on the quarterly update with senior management.

Create Group Summer Intern 2022, Dubai

A digital marketing agency focused on the Middle East. Worked on content and campaign strategy for large regional clients.

- Joined strategy sessions, client presentations and social analytics with the strategy and creative teams.

EDUCATION

University of Birmingham

B.Sc. Artificial Intelligence and Computer Science
2024 to 2027
Final year

Cheltenham College

A Levels
2021 to 2023
Mathematics A, Computer Science A, Physics A

Jumeirah College, Dubai

GCSEs
2019 to 2021
A* in Mathematics, Computer Science, Physics, Chemistry and Biology

TOOLKIT

AI and retrieval
PyTorch, Transformers, Hugging Face, FAISS, Qdrant, LangChain

Data
Python, DuckDB, PostgreSQL, Pandas, Polars, PL/pgSQL

Product
TypeScript, React, Next.js, Tailwind, Node, Swift

Infrastructure
AWS, Docker, Kubernetes, FastAPI, Cloudflare, Vercel

Agents
Claude Code, Codex, MCP, Elixir, Electron, tmux

PROJECTS

Symphony

Agent orchestration
Runs a fleet of Claude and Codex coding agents across three machines, and tracks every change they ship.
Elixir · Electron · TypeScript

ImpactOS engine

Data ingestion
Reads whatever a client uploads, maps it to the right reporting framework and answers questions about it in plain English.
Python · DuckDB · Parquet · Embeddings

Cortex

Knowledge app
A local-first knowledge app with its own sync service and Postgres backend.
Electron · React · Node · Postgres

Scout

Creator intelligence
Scores creators for a creator-economy investor the way a quant scores assets. Built summer 2026.
React · Supabase · Postgres
